REGISTRATION

SAM Active

Federal registration posture in place.

CERTIFICATION

**VOSB /
SDVOSB**

Veteran-owned contractor credentials.

Core competencies

- Applied AI / ML systems and governed agent operations
- Software platform development and mission-aligned delivery
- Workflow automation and operational tooling
- QA, testing strategy, traceability, and execution discipline
- Governance-aware systems with safety, policy, and approval posture

Differentiators

- Governed AI posture instead of prompt-only trust
- Execution rigor paired with technical ambition
- Credible product and systems orientation
- Veteran-founded, contractor-aware, and compliance-conscious presentation
- Transparent positioning without inflated claims

NAICS

- **541715** — Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
- **513210** — Software Publishers
- **541511** — Custom Computer Programming Services
- **561499** — All Other Business Support Service

Engagement posture

- Government and commercial engagement support
- Platform, automation, AI, and QA-oriented work
- Procurement-ready identity and certification framing
- Direct inquiry path through support@tmfpretty.com

Current proof points

- CARUSO — integrated PM / QA platform direction
- Constrails — external runtime governance and containment layer for AI agents
- Signal & Circuit — structured analytical publishing in the ecosystem
- Founder depth across AI/ML, product, quality, and systems leadership

Statement note

TMFPRETTY does not present formal past performance case studies on this sheet. The company instead emphasizes real products, technical direction, and accurate contractor identifiers.
